## Identical letters dated 11 June 2009 from the Permanent Representative of Lebanon to the United Nations addressed to the Secretary-General and the President of the Security Council

I have the honour to forward a position paper from the Government of Lebanon (see annex I) in preparation for the comprehensive assessment by the Secretary-General in his upcoming report on the implementation of Security Council resolution 1701 (2006). I have also attached the lists of Israeli and maritime and air violations of the Blue Line, along with a statistical summary table, as compiled by the Lebanese armed forces and covering the period between February and May 2009 (see annexes II-V, respectively).

I kindly request that the present letter and its attachments be circulated as a document of the General Assembly under agenda item 15 and of the Security Council.

## Annex I

### Lebanon's position paper in preparation for the comprehensive assessment by the Secretary-General in his upcoming report on the implementation of Security Council resolution 1701 (2006)

**11 June 2009**

1. In preparation for the periodic comprehensive assessment by the Secretary-General in his upcoming report on the implementation of Security Council resolution 1701 (2006), Lebanon reiterates its commitment to the full implementation of the resolution and calls on the international community to exert pressure on Israel to abide by its obligations under the resolution and ensure that progress can be achieved.

2. On 20 May 2009, the Permanent Representative of Lebanon addressed a letter to the Secretary-General and to the President of the Security Council (A/63/860-S/2009/264) concerning spying networks recruited by Israel and operating in Lebanon. The letter also referred to the assistance provided by Israel to certain Lebanese individuals, charged with spying for Israel, to cross the Blue Line and the technical fence into Israel illegally. Since then, several other networks were captured at an alarming rate, which only points to the hostile Israeli intentions towards Lebanon.

3. The above-mentioned spying activities constitute, as the Secretary-General explained in his previous report on the implementation of Security Council resolution 1559 (2004) (S/2009/218), a violation of Lebanon's sovereignty. Furthermore, they are violations of resolution 1701 (2006), including the line of withdrawal. The Israeli spying networks are aimed at destabilizing Lebanon and threatening its security. They threaten peace and stability throughout the region and add to existing tensions at a time when serious efforts are being exerted to achieve a comprehensive, just and durable peace.

4. Since the last assessment, the Israeli army has violated Lebanese air, land and sea — 388, 48 and 77 times, respectively (see annexes II, III and IV for lists prepared by the Lebanese Armed Forces for the period from 1 February 2009 to 22 May 2009). The large number of these violations underlines the Israeli persistence in breaching the Blue Line, the sovereignty of Lebanon, and resolution 1701 (2006). Lebanon demands an immediate cessation of these violations; it rejects and will not accept any attempt to link them with allegations of arms smuggling.

5. The Israeli Government and high officials, including the military, have continued to threaten Lebanon publicly and in the tripartite meetings in Naqoura. The Israeli threats have spared no civilian infrastructure or public institutions, under the pretext of arms stocking and smuggling allegations. These threats of aggression are not only a grave breach of the standing principles enshrined in the Charter of the United Nations, the spirit of resolution 1701 (2006) and Lebanese sovereignty, but also constitute a blatant violation of the responsibility of safeguarding international peace and security. Moreover, they are in contradiction with Israel's obligation to refrain from any unilateral act. In this regard, on 26 May 2009, the Israeli Defense Minister Ehud Barak warned that a possible outcome of the Lebanese parliamentary elections will expose Lebanon to the might of the Israeli army more than at any time in the past. Such threats are a direct interference in internal Lebanese affairs.

6. Despite all the mechanisms established by the United Nations Interim Force in Lebanon (UNIFIL) bilaterally and through the tripartite meetings, the Israeli army has continued its unilateral actions along the Blue Line. They persist, notwithstanding the understanding reached in the tripartite meetings that any unusual action along the Blue Line area should be coordinated with UNIFIL in advance. Such coordination is warranted as a sign of goodwill and as an effort to avoid tension and unnecessary escalation at the border. Respect by Israel for this coordination with UNIFIL is imperative.

7. Lebanon condemns any Israeli unilateral action targeting its territory under any pretext. The Lebanese Government reiterates its full respect for the strict implementation of resolution 1701 (2006) and that any hostile activity across the Blue Line — including on the one hand, Israeli breaches of Lebanese sovereignty by air, land and sea, and on the other hand, rocket firing — are blatant violations of that resolution.

8. The Lebanese Armed Forces (LAF) continues to enhance its operational and strategic cooperation with UNIFIL. In this regard, the LAF has intensified its cooperation in terms of joint patrols with UNIFIL in its area of operation. No new weapons were found within the area of operation of UNIFIL and so far all the weapons seized have been remnants of the 2006 Israeli war. Lebanon also has participated and will continue to participate in the tripartite meetings to maintain the calm along the Blue Line.

9. Following the recent Israeli aggression on the Gaza Strip, the LAF succeeded in maintaining peace and stability in South Lebanon and preventing any repercussions within Lebanon. In this regard, the LAF has increased its presence in the UNIFIL area of operation and along the Blue Line. The LAF has also conducted with UNIFIL large-scale search operations in areas with a high probability of the incidence of illegal activities and disruption of peace and security.

10. With respect to the marking of the Blue Line, Lebanon reiterates the agreement in the tripartite meeting to enhance and expedite this process.

11. Despite all the efforts made by UNIFIL to facilitate the full withdrawal of Israel from the northern part of Ghajar, and the cooperation of the Lebanese Government with UNIFIL towards that objective, the Israeli army continues to occupy the area in contravention of its obligation to withdraw unconditionally behind the Blue Line in accordance with resolution 1701 (2006). Lebanon has accepted the proposal of UNIFIL for an interim resolution of this issue that would end the Israeli occupation. On the other hand, the Israeli Prime Minister has recently suspended negotiations with UNIFIL concerning the withdrawal. Also, a high-level official within the office of the Israel Defense Minister recently criticized the UNIFIL Commander General Graziano for his efforts to resolve this issue, accusing the commander of seeking personal political gains.

12. The continued Israeli occupation of the Kafarshuba Hills and the Lebanese Shab'a Farms constitutes a threat to stability and security along the border and is a violation of Security Council resolution 425 (1978). Lebanon demands a full and unconditional Israeli withdrawal from these lands as a comprehensive resolution of this issue. However, we recall the proposal for an interim solution contained in the seven-point plan of the Lebanese Government and urge the Secretary-General to

intensify his diplomatic efforts to ensure an Israeli withdrawal from these Lebanese lands and to put them under the interim jurisdiction of UNIFIL.

13. In the last 72 hours of the 2006 Israeli war on Lebanon, Israel dropped about four million cluster bombs all across South Lebanon after the adoption of resolution 1701 (2006), in which the Security Council called for the cessation of hostilities. Many failed to detonate on impact, becoming de facto landmines, which have proven to be a deadly threat to unsuspecting civilians. Twelve million square metres of land remain contaminated.

14. Since the cessation of hostilities, the delayed Israeli submission of the data of the strike locations of the unexploded ordnance, including the cluster bombs that it dropped and that landed indiscriminately in civilian areas, has caused the death and injury of about 340 people, 34 of whom are children. Most of the information received recently from Israel was already known as a result of the casualties themselves and three years of reconnaissance, survey and clearance operations conducted by the LAF, assisted by United Nations agencies and non-governmental organizations (NGOs).

15. The LAF is still assessing the recently received data; however, the accuracy of the data is uncertain, considering past experience and the assessment results so far. In this regard, 37 contaminated sites confirmed previously by the LAF do not appear in the provided data. Also, the received data does not specify the direction and the altitude used by Israeli aircraft when cluster munitions containers were dropped, making it impossible to pinpoint the dispersion shape of the sub-munitions and their accurate drop places. In addition, the quantity and types of bombardment means were mentioned as "unknown" in the data.

16. The LAF has requested aerial photographs or taped videos of the targeted positions before and after the bombardment. Information concerning the date, quantity and types of ammunitions used during the Israeli raids was also requested.

17. This humanitarian crime adds to another ongoing one, resulting from landmines which Israel has planted in Lebanon since 1948, including during its 22-year-old occupation of Lebanese lands. It also adds to the many crimes that Israel has inflicted on Lebanon and its citizens — crimes for which Israel will have to pay due reparation. Lebanon urges the United Nations and the donor countries to continue addressing this issue in order to secure the lives of innocent civilians.

18. The Israeli army has continued to patrol boats illegally within Lebanese territorial waters, close to what it calls a "line of buoys" that it had illegally and unilaterally installed inside Lebanese territorial waters. Israel falsely claims that the said line is close to the border of the Lebanese southern territorial waters. The Israeli army has also continued to fire warning shots, throw hand grenades at Lebanese fishing boats, and regularly drop explosive charges in the vicinity of the said Israeli line and within Lebanese territorial waters.

19. The Secretary-General warned in his previous report on the implementation of resolution 1701 (2006) (S/2009/218) that such Israeli actions have the potential to raise tension between the parties. Lebanon does not recognize any line that was unilaterally installed and considers the Israeli actions as further violations of Lebanese sovereignty and resolution 1701 (2006). Lebanon further requests UNIFIL to install a line of buoys in conformity with international standards in the area.

20. Lebanon re-emphasizes the importance of enhanced international assistance in building the capabilities of its army. This will ensure the readiness of the LAF to discharge its duties in defending Lebanese sovereignty and protecting the Lebanese people.

21. The Lebanese Government adopted a decision in December 2008 that, among other things, extended the model of the Common Border Force used for the northern border to an additional segment of the eastern border, and created a ministerial steering committee on the borders.

22. An operational plan developed by a border commission, headed by the LAF with the participation of the Lebanese Internal Security Forces, Customs and the General Security, was adopted. The plan divided the model extension into three stages along the eastern border as follows:

- 1st stage from the town of Hermel to the village of Ersal
- 2nd stage from Ersal to the Masnaa border crossing
- 3rd stage from Masnaa to the Shab'a Farms

23. Preparations for the 1st stage, with a length of 70 kilometres, have been finalized, and a workplan has been elaborated. In this regard, a workshop to discuss the workplan was organized by the LAF, with the participation of the relevant Lebanese ministries and donor countries on 3 and 4 June 2009. It is anticipated that the workplan of the 1st stage would be fully implemented by 1 June 2010, provided that funding for equipment, recruitment and training is available.

24. For this purpose, the LAF has recently established the second land border regiment and appointed a commander at its helm. The second land border regiment will be the core of the extended Common Border Force. The first land border regiment had been established previously for the initial Common Border Force along the northern border. The LAF and the Lebanese security agencies have not reported any incidents of arms smuggling since the previous report of the Secretary-General to the Security Council on the implementation of resolution 1701 (2006).

25. Also on the issue of border control, the northern border crossing of Bokayaa between Lebanon and Syria was officially opened on 26 April 2009. In addition, the nearest point of the Aboudieh northern border crossing between Lebanon and Syria will be operational in full compliance with international standards during the month of June 2009.

26. On the economic front, we reiterate the call upon the international community in resolution 1701 (2006) to consider further assistance for the reconstruction and development of Lebanon. In this context, we urge the States participating in Stockholm, Paris III and Vienna conferences to fulfil their pledges. Lebanon greatly appreciates all the economic and social programmes and humanitarian assistance that UNIFIL provides to the Lebanese in its area of operation, including through quick-impact projects and medical emergency services.

27. It remains that stability and security cannot be sustained unless a permanent ceasefire replaces the precarious situation of the cessation of hostilities.

Statistical summary table

| | Aircraft container CBU-58 | Multiple launch rocket system (MLRS) 227mm | Artillery 155mm | Total | Lebanon Mine Action Centre (LMAC) data | Accuracy % |
|---|---|---|---|---|---|---|
| Shells quantity | 1 258 | 2 274 | 12 000 | **15 532** | **33 800*** | 46 % |
| Targeted positions | 252 | 371 | 413 | **1 036** | **1 073**** | 96.5 % |
| Submunitions quantity | 817 700 BLU-63 | 1 464 456 M-77 | 1 056 000 M42, M46 and M85 | **3 338 156** | **3 975 200** | 84 % |
| Failure rate 35% | Unexploded submunitions | | | **1 168 355** | **1 391 320** | 84 % |

* These figures are based on the Israeli media. In order to reduce the impact of worldwide discontent, they increased the number of shells with which the high failure rate might justify the high number of casualties caused by cluster bombs.

** Confirmed locations.

## Conclusion

1. Most of the information received from the Israeli enemy was already known, as a result of 340 victims and 3 years of reconnaissance, survey and clearance operations conducted by LAF – Engineer Regiment and NGOs.

2. The accuracy of the data received is subject to suspicion, due to the bad experience with the Israeli enemy regarding the delivering of mine maps. In addition, the LAF found that 37 confirmed contaminated sites did not appear in the information sheet. It is expected that Israel is not ready to provide Lebanon with accurate and efficient information without a political price.

3. Approximately 300 locations were bombarded with an unknown quantity of submunitions, which will cause a conflict in determining the accurate number of those munitions.

4. The information received did not specify the direction and the altitude used by aircraft during the drop of containers. Therefore, it is impossible to pinpoint accurately the shape of the submunitions dispersion and the place where they fell.

5. The workplan already developed by LAF-LMAC remains valid for execution, taking into consideration the additional information received after study, assessment and verification through clearance operations.

## Recommendations

1. Maintain the workplan already developed by LAF – LMAC to clear the cluster bomb unit (CBU) strikes locations.
2. Assign the operations staff of LMAC to conduct a technical survey for the CBU strikes located north of the Litani River in order to verify and assess the accuracy and the reliability of the Israeli information.
3. Request UNIFIL to:
   (a) Obtain from the Israeli enemy:
      (i) The direction and altitude used by military aircraft during the drop of containers to be able to pinpoint accurately the shape of the submunitions dispersion and the place where they fell;
      (ii) Aerial photographs or video of targeted positions (before and after the bombardment);
      (iii) Quantity and types of bombardment means mentioned in Israeli maps as "unknown";
      (iv) The date, quantity, and types of ammunition used during the hostilities to bombard all the locations;
   (b) Execute reconnaissance missions for the CBU strikes located in their area of deployment to verify and assess the accuracy and reliability of the Israeli information, and to provide LAF with the results through UNIFIL;
   (c) Confirm the finality of the information by providing the LAF with official written and signed documents.
